

# Square Template

120mm x 120mm

## Trim Area

This will be where the print is cut to, so represents the edges of the artwork, anything outside of this line will be lost.

## Bleed Area

A 3mm extension used to accommodate any slight movement during trimming, extend any images or solid areas to the red to prevent white lines appearing on your print.

## Safe Area

Put any text or significant imagery outside of this area so it does not get obscured, it will act as a comfortable margin to keep your artwork aesthetically pleasing. If you are using an all over background colour or image / pattern this can continue to the bleed area

## Saving PDF

Save your PDF with crops and 3mm bleed, make sure all fonts are embedded and the output is set to CMYK, if using *illustrator*, use default settings with use document bleed settings ticked.
